DESCRIPTORS: *Anthropology, *Polynesia, Culture, Translations

The aim of this article is to prove that there were not two different peoples on Easter Island. The division into short-ears and long-ears is a division between two groups of the same people. The evidence in favor of this statement is from a small "kohau rongo-rongo" text deciphered by the author. This text is inscribed on the small Chile tikki and represents a genealogy consisting of six names. (Author)
